2 PRECISION MANUFACTURING PROCESSES

3 SILVER CONNECTORS

4 DIRECT OE REPLACEMENT

5 FIT - FUNCTION VEHICLE TESTED

BRAKE WEAR SENSORS

We don't just manufacture Brake Wear Sensors, We manufacture Safety.

TekMaster® by DMA offers one of the most complete lines of **BRAKE WEAR SENSORS** for the automotive aftermarket parts industry. Starting with a benchmark of OE fit, function and engineering, our design and material specifications surpass many of the top brand names in the industry. As every sensor is quality tested for connectivity and functionality before release to the market, you can install with confidence. **DMA** offers a leading 12 month unlimited mileage warranty on all of its sensors.

Many "Dealership Only" sensors are now available to you and can be sourced directly at greatly reduced prices. With significant inventories stocked here in the USA, you will not find yourself waiting for order shipments from Europe or Asia. Our low minimum purchase requirements allow you to right size your sensor inventories. As all of our sensors come single packaged, you're not forced into over buying case packs.

DMA's customer service team provides our customers with accurate cataloging, vehicle application references, detailed product marketing support and fast and friendly order support. Product information is also available through industry-leading electronic cataloging programs such as **Epicor** and **WHI Solutions** as well as MyCarParts <https://tekmaster.mycarparts.com/>.
